- After attending an all on X course and based upon individual qualifications, participants may be eligible to complete a LIVE surgery with Dr. Alijanian. (Fee to be determined based on case selection).
- www.centurionpracticecenter.com

This two-day comprehensive, LIVE patient course is excellent for all practitioners wanting to learn more about Zygomatic implants using the All on X digital workflow. This hands-on course covers pre-surgical and surgical treatment planning, surgical procedures, and clinical protocols for placing zygomatic implants as a graftless solution for rehabilitation of the atrophic maxilla. We will also review the step-by-step prosthetic protocol with the digital workflow. This will all be demonstrated with a live patient.

This course is also designed to achieve predictable long-term results by learning all potential complications associated with Zygomatic Implants.

Attendees who complete this course will qualify to perform a live surgery with Dr. Alijanian. This will be assessed on an individual basis.
(Fee to be determined based on case selection).
