## HANDS-ON PROGRAM AND LIVE CASE OBSERVATIONS

Discover how the 9.3-micron CO2 all-tissue laser can elevate your practice through improved clinical effectiveness, patient experience, practice efficiency, and procedural expansion. This comprehensive program merges clinical and business cases with hands-on experience to demonstrate the benefits that reliably anesthesia-free, blood-free, and pain-free procedures provide you and your patients.

- **Novel Technology:** Explore how the 9.3-micron wavelength enables precise, controlled tissue management of enamel, dentin, decay, gingiva, and bone.
- **Clinical Versatility:** Learn how the 9.3-micron CO2 all-tissue laser can benefit almost every patient, every day with applications in restorative, soft tissue, implant, airway, tethered oral tissues, and cosmetic procedures.
- **Practice Impact:** Understand how improved efficiency, clinical effectiveness, and patient experience combine to create a profound impact on practice growth.
- **Hands-On Experience:** Gain experience cutting with the laser on extracted teeth and pig jaws, demonstrating ease of use, clinical effectiveness, and seamless transitions between different tissues.
- **Live Case Observation:** Witness live procedures in a true clinical setting to gain firsthand understanding of the technology's speed, precision, and impact on dental practices and patient experience.
